

Zensar Mainframe Modernization: Optimize Costs, Unleash Resource Flexibility, and Elevate User Experience

Experience the power of seamless integration, heightened productivity, resource flexibility, enhanced agility, and scalability.

We helped our clients achieve their passion:

A 130+ year legacy African banking giant

We successfully **rehosted** their mainframe application in Azure, while preserving and leveraging the valuable experiences of the existing team.

Achieved over 60% reduction in hosting expenses

A 175+ year legacy premium African financial services group

We **refactored** ObjectStar applications to Java and Angular on AWS, while maintaining their functionality.

Achieved over 70% reduction in operational expenses
