

Bringing in velocity  
through measurable  
business outcomes  
with a new approach to  
SAP delivery

## The context

Zensar offers a comprehensive portfolio of offerings spanning across the life cycle of SAP solutions on the latest SAP Digital platform S/4HANA. We have a strong SAP consulting workforce, with over 5000 person-years of experience in executing 250+ projects across implementation, rollouts, upgrades, migrations, and application management over the last 17 years.

Over these years, we have realized that transforming the complete SAP landscape can be a very complex task. Doing it fast, and in an agile way, adds more complexity to it. When approached with the traditional, manual processes, this task becomes slow and error prone.

By partnering with Basis Technologies, we were able to solve this problem together. Our alliance uniquely equips us with the critical SAP automation needed to transform the way SAP systems are managed. This approach helps us deliver change fast and reliably – helping you stay ahead of competition, respond to market changes faster and reduce costs with lower risks.

# Engineered for SAP

## Our new approach

Our strong SAP capabilities ensure that customers get the right insight, expertise and technical resources needed to innovate faster, reduce costs, and lower risks. One of the resources we use is SAP DevOps and test automation solutions to manage, understand and improve your SAP systems. These product-based solutions include:

## ActiveControl

ActiveControl accelerates SAP development with faster, safer and more frequent delivery of SAP change

## Testimony

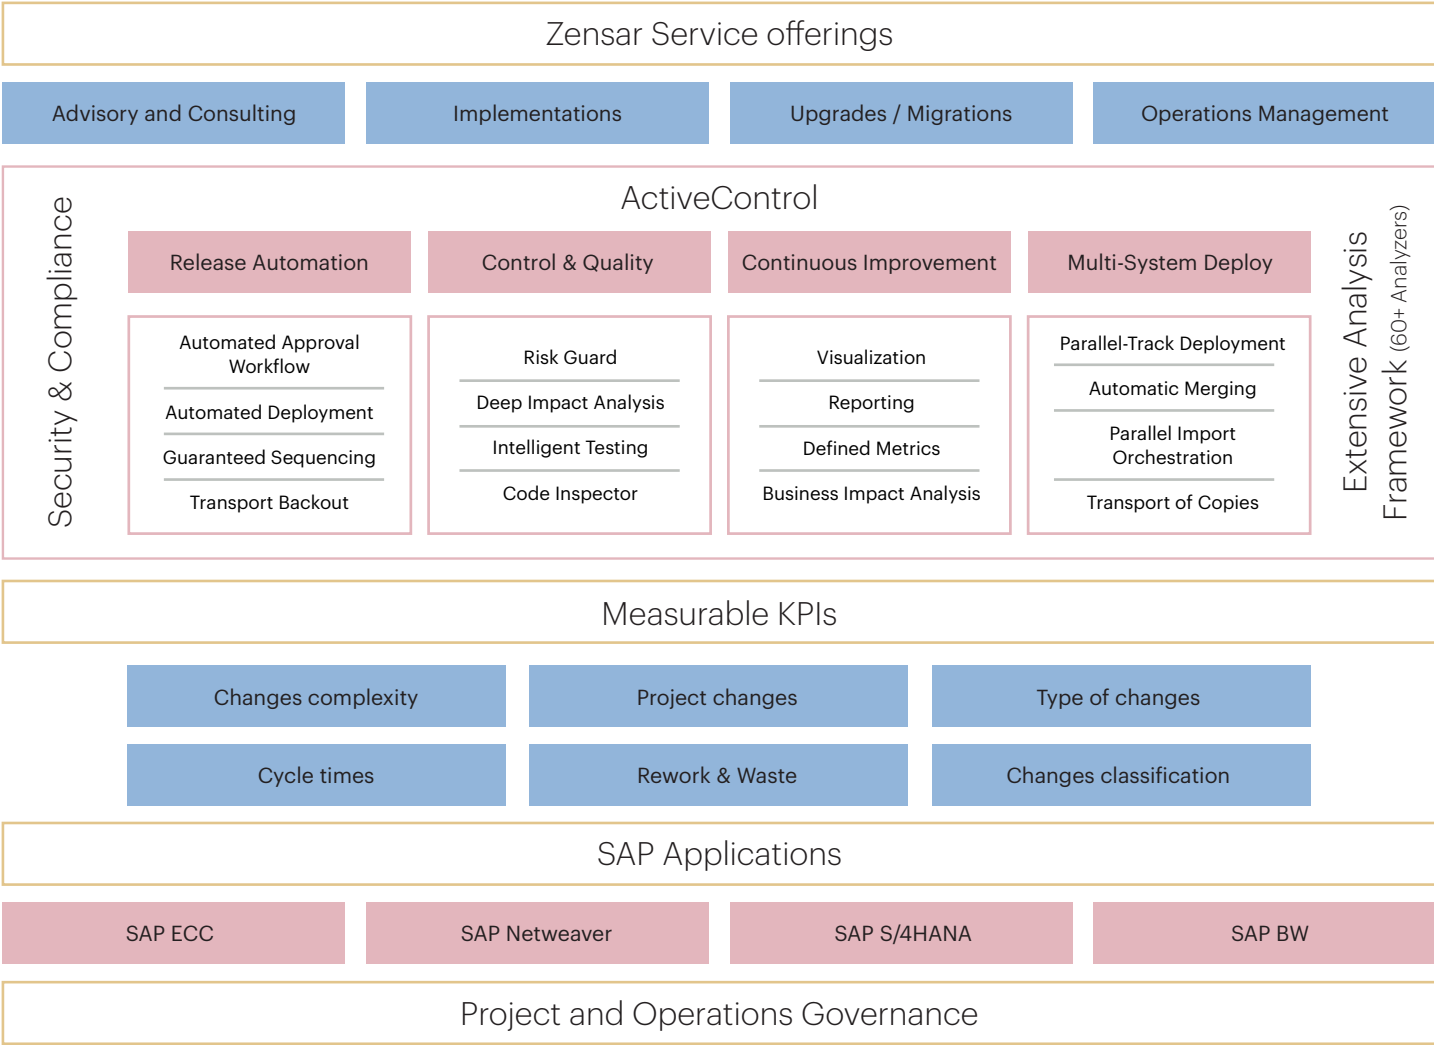

Testimony reinvents SAP regression testing with automation, without the need of scripting or test maintenance, and brings velocity to quality

Together, they form a completely automated DevOps & Testing Platform that is engineered for SAP. The platform is certified by SAP for use on S/4HANA and NetWeaver, and supports agile development, DevOps and Continuous Delivery in SAP environments.

# How our platform fits into the SAP ecosystem

Zensar offers a comprehensive portfolio of offerings spanning across the life cycle of SAP solutions on S/4HANA besides other SAP applications. These offerings are augmented further by Basis Technologies’ proprietary tool "ActiveControl". It improves the implementation, upgrade/migration and operation tasks through features such as release automation, continuous improvement and multi-system deployment. ActiveControl also helps ensure security and compliance across the system. Its extensive analysis framework, consisting of over 70 checks, provides the confidence needed to change SAP systems at high speed.

A decorative white line graphic is located on the left side of the slide. It starts from the top left, curves downwards, and then continues as a straight line towards the bottom left, forming a partial 'C' shape that frames the main text area.

# Velocity in business outcomes

## Our impact

Powered by Automation & DevOps  
solutions by Basis Technologies

We are always moving in directions that take help us better meet our client objectives. In this case, that direction was augmenting SAP delivery through automation.

The platform is engineered to enable continuous delivery to thrive in SAP systems, giving companies the agility needed to adapt to rapidly changing priorities and market demands. Organizations in more than 30 industries see this approach as a must-have for adopting agile development, DevOps and Continuous Delivery in SAP.

By using this solution powered by Basis Technologies, we are able to bring velocity to our clients in the form of business outcomes like:

- Bringing down the cost of SAP change by 50%
- Delivering 90% of changes/customisations from development to production with no human intervention
- Effecting innovation up to 50 times faster to meet business demands

This solution also helps by:

Reducing errors,  
incidents, and downtime

Eliminating manual  
effort

Accelerating time  
to value

Boosting governance,  
compliance and visibility

Want to know how to leverage this approach  
for your business? Get in touch with us

We conceptualize, build, and manage digital products through experience design, data engineering, and advanced analytics for over 130 leading companies. Our solutions leverage industry-leading platforms to help our clients be competitive, agile, and disruptive while moving with velocity through change and opportunity.

With headquarters in Pune, India, our 10,000+ associates work across 33 locations, including San Jose, Seattle, Princeton, Cape Town, London, Singapore, and Mexico City.
