

## Cloud Migration Automation as a Service

Accelerate your journey to the cloud

Zensar's Migration Automation as a Service has different automation levers infused throughout the migration stages that help organizations mitigate challenges in their existing cloud journey by bringing a third-party view.

We help our clients leverage automation to increase their cloud modernization success by:

### Reducing modernization timelines

A leading vehicle manufacturer **reduced** modernization **timelines** **by 60%** through our automated app modernization

### Bringing down modernization and operation costs

A leading agro and dairy product manufacturer achieved **40% reduced OpEx** costs and **66%** reduced modernization timelines

Schedule a free workshop with our cloud and automation leaders and receive recommendations to optimize your migration plan.

### Zensar Services

- Experience Services
- ▲ Data Engineering and Analytics Services

- ▲ Advanced Engineering Services
- ▲ Application Services
- Digital Foundation Services

### We Accelerate

different stages of cloud migration using automation tools and accelerators:

- Cloud Strategy and Adoption
- Cloud Foundation
- Discovery, Assessment, Planning,
- Migration, Testing and Cutover
- Cloud Operations

### Our Approach

We use frameworks and accelerators like Transform2Micro, Blueprint 27 and many more that are developed with years of migration experience. As part of our factory model, we identify the applications through application disposition and put them through the automation-infused migration life cycle:

- Application prioritization pipeline
- Cloud Assessment
- Migration Pattern Assessment
- Migration
- Operations Management
- Cloud Optimization

### Our Benefits

- **Up to 50% faster migrations**
- **Up to 40% lesser cost** for migration than peers
- **Reduce TCO by up to 60%**
- Around **70%** of the **migration automated**
