

# Backup as a service (BaaS) solution

Enabling cost savings and reduction in manual efforts by up to 80 percent

## The current data protection landscape

The data protection strategies of organizations today need to keep up with the rapid advances in technology. The solutions leveraged for this purpose must constantly evolve and be robust. Today, all organizations are planning to upgrade their data protection solutions. Effective data protection will be critical in successfully executing strong digital transformation (DX) initiatives.

Over the past few decades, we have helped many clients adopt and deploy cutting-edge technology stacks for backup modernization projects. We have successfully performed multiple large-scale hybrid cloud backups, infrastructure service transformations, and transitions from incumbent providers. Our services and solutions have enabled organizations to minimize capital expenditure and realize the best recovery point objectives.

## Leverage a highly evolved secondary storage solution

With HYCU as our backup solution partner, we seamlessly help you meet your data protection, retention, and archival needs. Our backup-as-a-service (BaaS) solution is an intelligent integration of effective frameworks and technologies. It enables the efficient use of industry-leading tools as backup targets for production, testing, and disaster recovery (DR) scenarios. The solution works across the storage technology and management layers to ensure efficient and cost-effective storage resources.

Some of the key features of our solution are:

Supports AHV, ESX, Nutanix Files, VGs, ROBO, Xi leap, Xi clusters, and more

Agentless architecture that can discover and protect all applications

Backup protection against ransomware with highly secure backups, WORM on S3

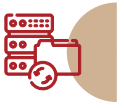

Secure authentication and access control policies

General Data Protection Regulation (GDPR), Criminal Justice Information Services (CJIS), and Motion Picture Association (MPA) compliance

Integration with most storage solutions

Extensible backup to the petabyte scale

Fast and easy provisioning of new storage services and buckets

Proactive monitoring and management

# How we help in your cloud transformation journey

## HYCU ON-PREM

Diverse platform support with agentless backup and recovery, migration and DR capabilities

## JOURNEY TO THE CLOUD

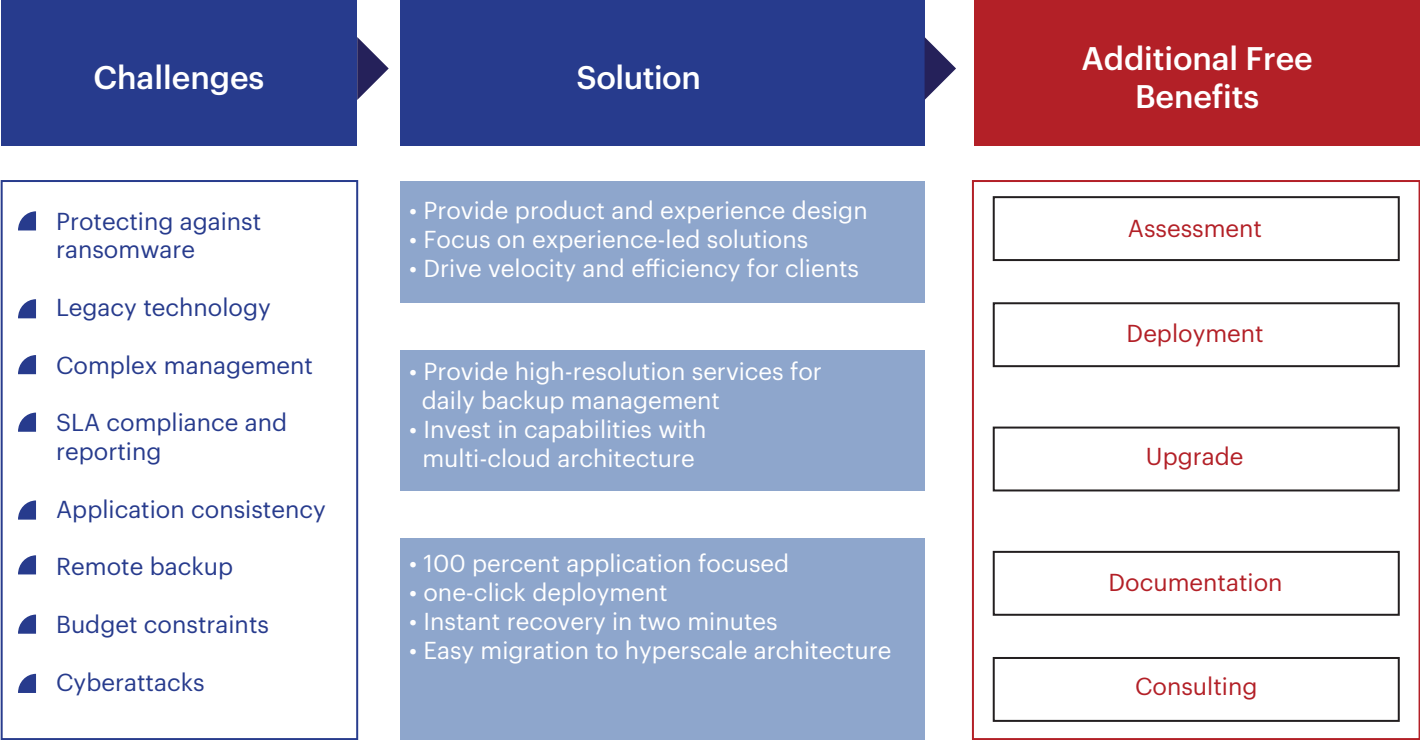

Move workloads between on-prem and cloud coupled with DR capabilities

## HYCU IN THE CLOUD

Multi-cloud support with agentless backups, migration provided as a SAAS offering

# How we address common client challenges

We help clients transform their systems into multi-cloud architecture, compiled with industry and data center standards

### **Backup – On-premises or cloud**

Flexibility to choose any cloud provider

### **Pay as you grow**

On demand with minimum commitment

### **Managed storage**

24/7 monitoring and management

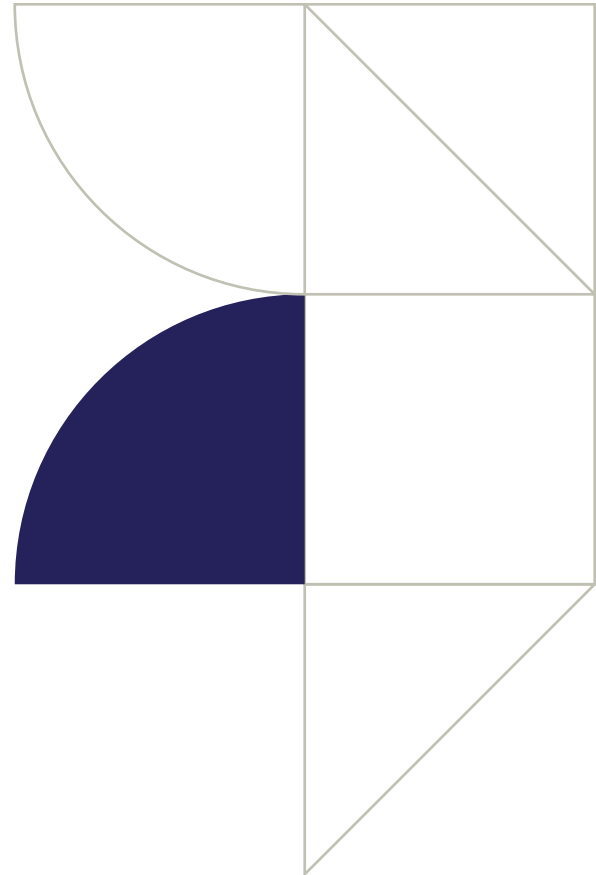

### **Comprehensive reporting**

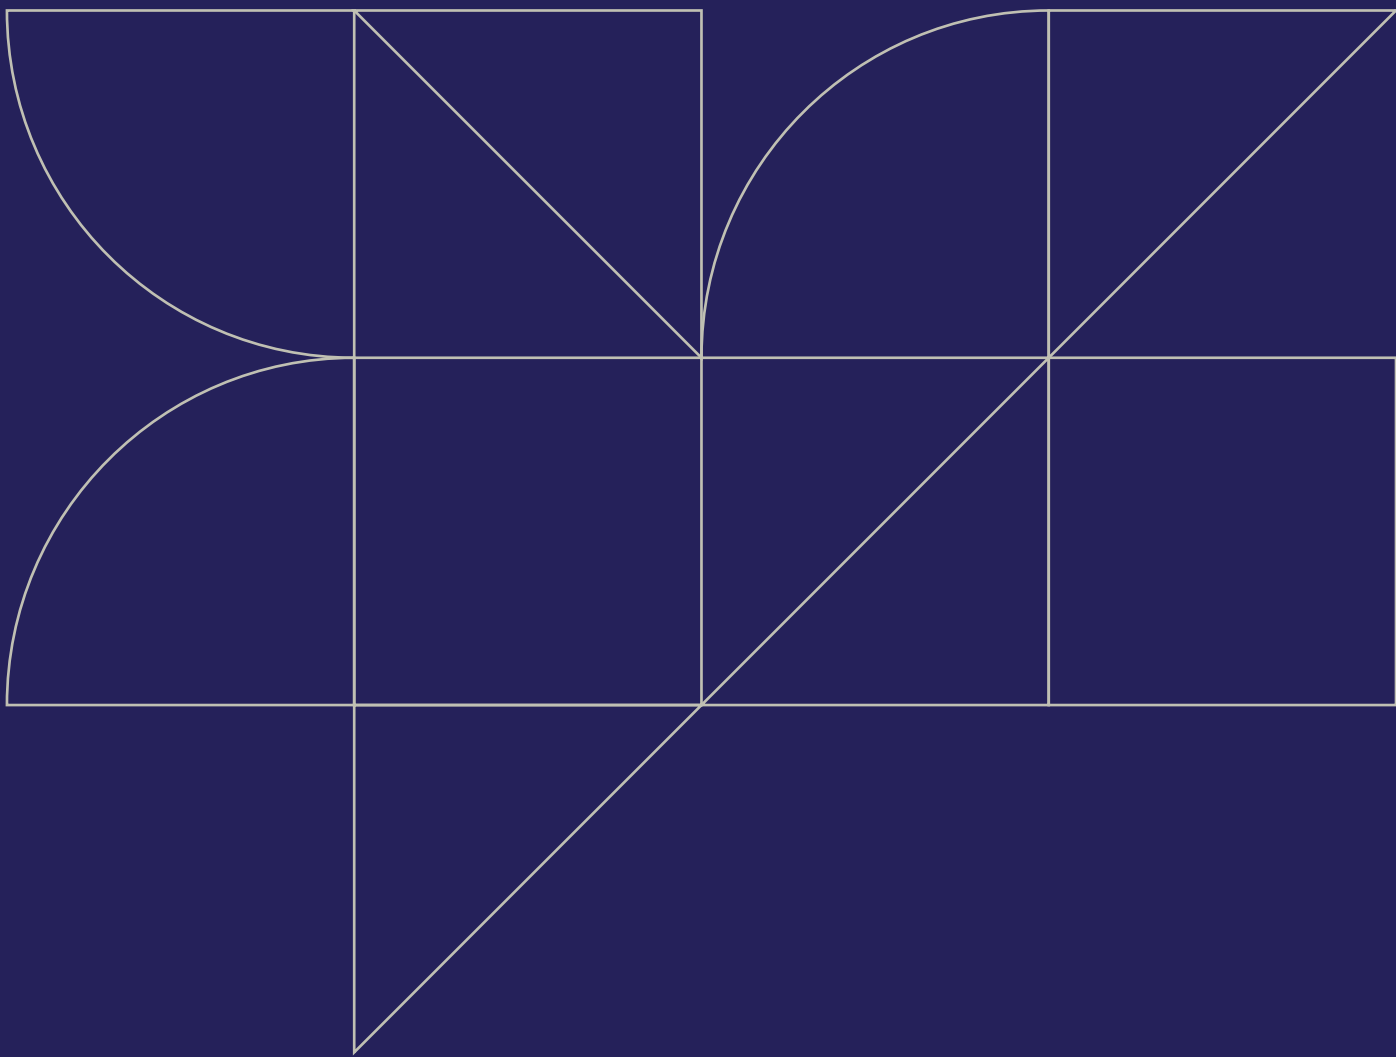

Leverage single dashboard, simple management with app and crash consistency

### **Saves cost**

Enables cost savings and reduction in manual efforts by up to 80 percent

# zensar

An  **RPG** Company

We conceptualize, build, and manage digital products through experience design, data engineering, and advanced analytics for over 130 leading companies. Our solutions leverage industry-leading platforms to help our clients be competitive, agile, and disruptive while moving with velocity through change and opportunity.

With headquarters in Pune, India, our 10,000+ associates work across 33 locations, including San Jose, Seattle, Princeton, Cape Town, London, Singapore, and Mexico City.
