Cloud**

For the Digital Age

Brochure

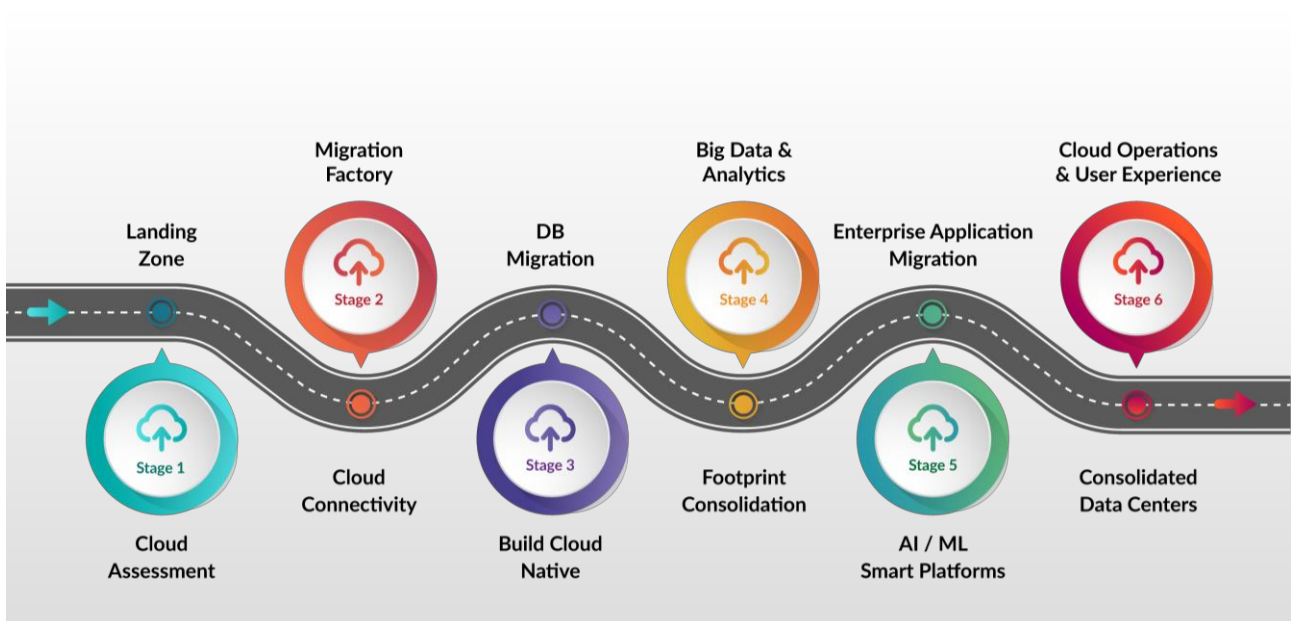

Invisible Cloud, Infinite possibilities

The flux in the global business landscape caused by the technological disruptions is making enterprises adopt new age digital technologies, DevOps approach and hybrid cloud models to stay relevant.

Clearly, winning and retaining customers in such times demands a digital-ready infrastructure whose digital-ready systems and processes can support ever-evolving customer and user requirements.

So how can businesses transform their infrastructure to keep pace with the rapidly changing digital landscape? How can they unleash innovation with an agile, resilient infrastructure foundation that eliminates vendor lock-in and optimizes cost?

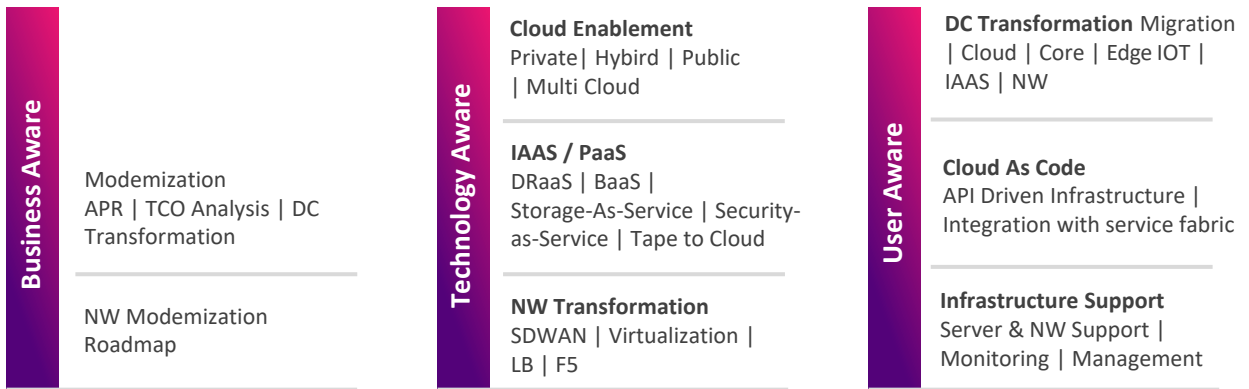

Co-Create your Digital Infrastructure with Zensar

Zensar Digital Infrastructure Services

Zensar’s Digital Infrastructure offerings transform the legacy infrastructure with next-gen digital services. It allows customers to respond with speed, agility and scale by building resilient and scalable software defined infrastructure.

Services

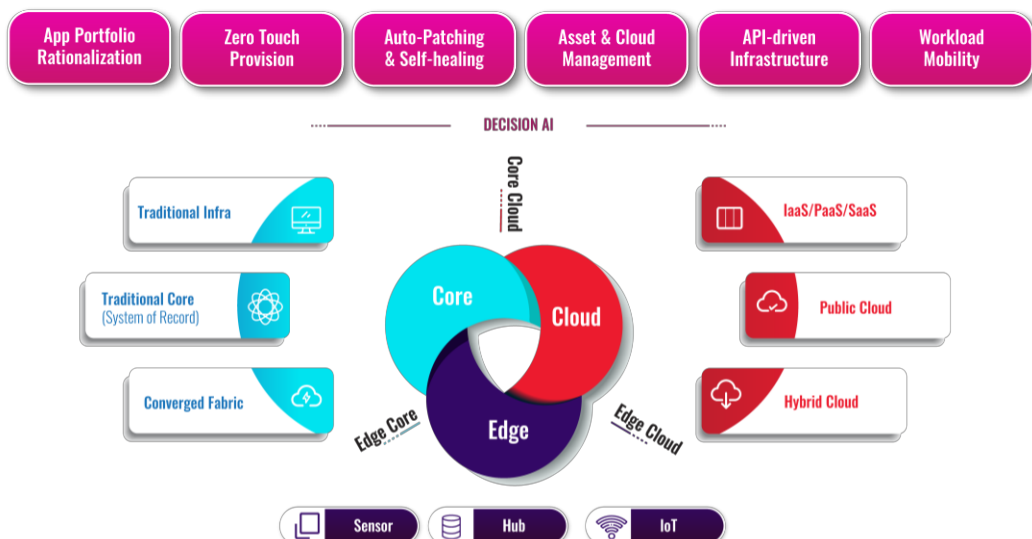

Business Benefits

- 10X higher frequency of releases
- Provisioning time down to minutes from weeks
- Guaranteed 99.999 availability
- Technology Coverage across Core, Cloud and Edge

Zensar’s Wired Autonomous Cloud Solution

Autonomous cloud capabilities for faster deployments and higher quality products

Wired Autonomous Cloud is Zensar’s Platform that allows customers to develop any app, deploy in any cloud and deliver to any device. It does so by providing a control pane for managing the artifacts across a datacenter in: Core, Cloud and Edge. The platform provides the following unique benefits to ensure performance & best-in class infrastructure management.
