**Zensar's Hybrid
Cloud Backup
solution**

With rapid growth in data and using the traditional on-premises backups, can add huge costs to any organization. The best backup solution is the combination of onsite local backups with offsite cloud backups ensuring secure data protection and recovery in the Hybrid cloud backup.
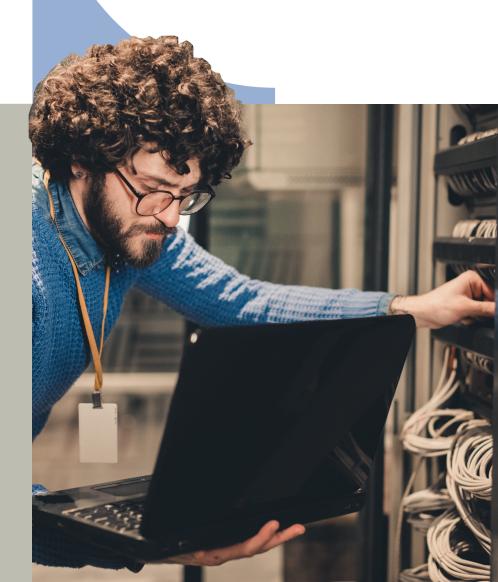

Zensar strongly recommends to shift to Azure Hybrid Cloud Backup-as-a-Service.

See what customers are saying:

We were delighted to have Zensar as a trusted backup partner. Their comprehensive hybrid cloud backup solution helped us transition to a highly intelligent and centrally monitored backup infrastructure. The team worked closely with us and used the best practices and industry standards in the implementation and execution phases. Today, we have more control over our data protection strategy and can recover in a matter of seconds.

– CIO, Hitech Manufacturing firm

What we offer

Zensar Hybrid Cloud Backup-as-a-Service extends the on-prem backup estate to the cloud with three Azure backup data tiers – snapshots, vaults, and archives (long term retention). It reduces maintaining a unified access path to the data through initial full estate backup, followed by incremental and transaction log backups. The solution leverages the following Azure features along with pre-existing on-prem backup vendor tools to provide a strategic hybrid cloud backup foundation:

Azure Locally Redundant Storage or Geo Redundant Storage or Zone Redundant Storage
These redundancy options provide you with highly available data storage capabilities of at least 12 9s

Azure Recovery Services Vault (Management Plane)
Vault provides an interface for users to interact with the backup service

Azure Backup managed storage
Customer's Azure subscription will have blob, block, and file share storage for backup data

Azure Virtual Network and Network Security Group
Always-on virtual network in the selected Azure region with multiple subnets. Inbound and outbound access for the applications, databases on specific ports. Site-to-site VPN between on-prem and backup regions

Why choose Zensar for Hybrid Cloud backup?

Zensar's Hybrid Cloud Backup is differentiated by its

- Agility to rapidly develop, test and launch software applications that drive business growth

- Flexibility to work with any storage technology

- Manage workload as per client needs
