CONVERSION RATE OPTIMIZATION (CRO)

**MORE IMPORTANT TODAY,
THAN EVER BEFORE**

Covid-19 has forced more people online than ever before, and more people will continue to purchase online even as behaviours go back to normal. B2B and D2B providers are moving into the B2C and D2C consumer space, forming new retailers who are serving customers direct for the first time.

The move online has accelerated digital change. All new experiences have been built and pushed to market. These are poorly optimized as speed to market has been the priority and not great customer experience.

To help you solve these problems we craft insight-driven design and technology solutions that help your customers to convert.

MORE PEOPLE ARE GOING ONLINE DUE TO COVID-19 RESTRICTIONS

First-time purchases on ecommerce sites of traditional chain stores grew **119%** year on year in April

80% of businesses are dissatisfied with their conversion rates, according to Econsultancy

1 in 5 people still expect to do more online after lockdown ends, says Foolproof research

Global sales on Amazon increased **26%** in Q1 2020 to **\$75.5bn**

Using correct targeting and testing methods can boost conversion rates by **300%**, based on a study by Marketing Experiments

WHAT IS CRO?

Conversion rate optimization (CRO) is the systematic process of increasing the percentage of website visitors who take a desired action and complete a goal.

WHY IS CRO SO VALUABLE TO YOU?

CRO IS THE KEY TO UNLOCKING CUSTOMER AND BUSINESS VALUE

It delivers increased revenue, reduces cost to serve, and heightens scores for customer experience.

As a marketer you can do more for less. Meaning you can re-invest savings into digital transformation and new product development.

It helps you drive digital change within your organization, promoting an agile experimentation culture underpinned by evidence at speed.

It helps you better understand your customers' objectives, helping you design better customer experiences and achieve higher performing sales journeys which move the needle for your customers.

THE CHALLENGES WITH THE CURRENT CRO MODEL

Having worked with businesses across many industry verticals, we find that organizations often lack the ability to view conversion rate holistically, and attempts to optimize are uncoordinated and sub-optimal with little long-term success.

FIVE COMMON PROBLEMS AFFECTING CRO'S PERFORMANCE TODAY ARE:

— Too much focus on data science, not enough on human behavior

— Chasing short term wins over long term sustainable changes to UX

— CRO strategy is fragmented, with accountability and ownership unclear

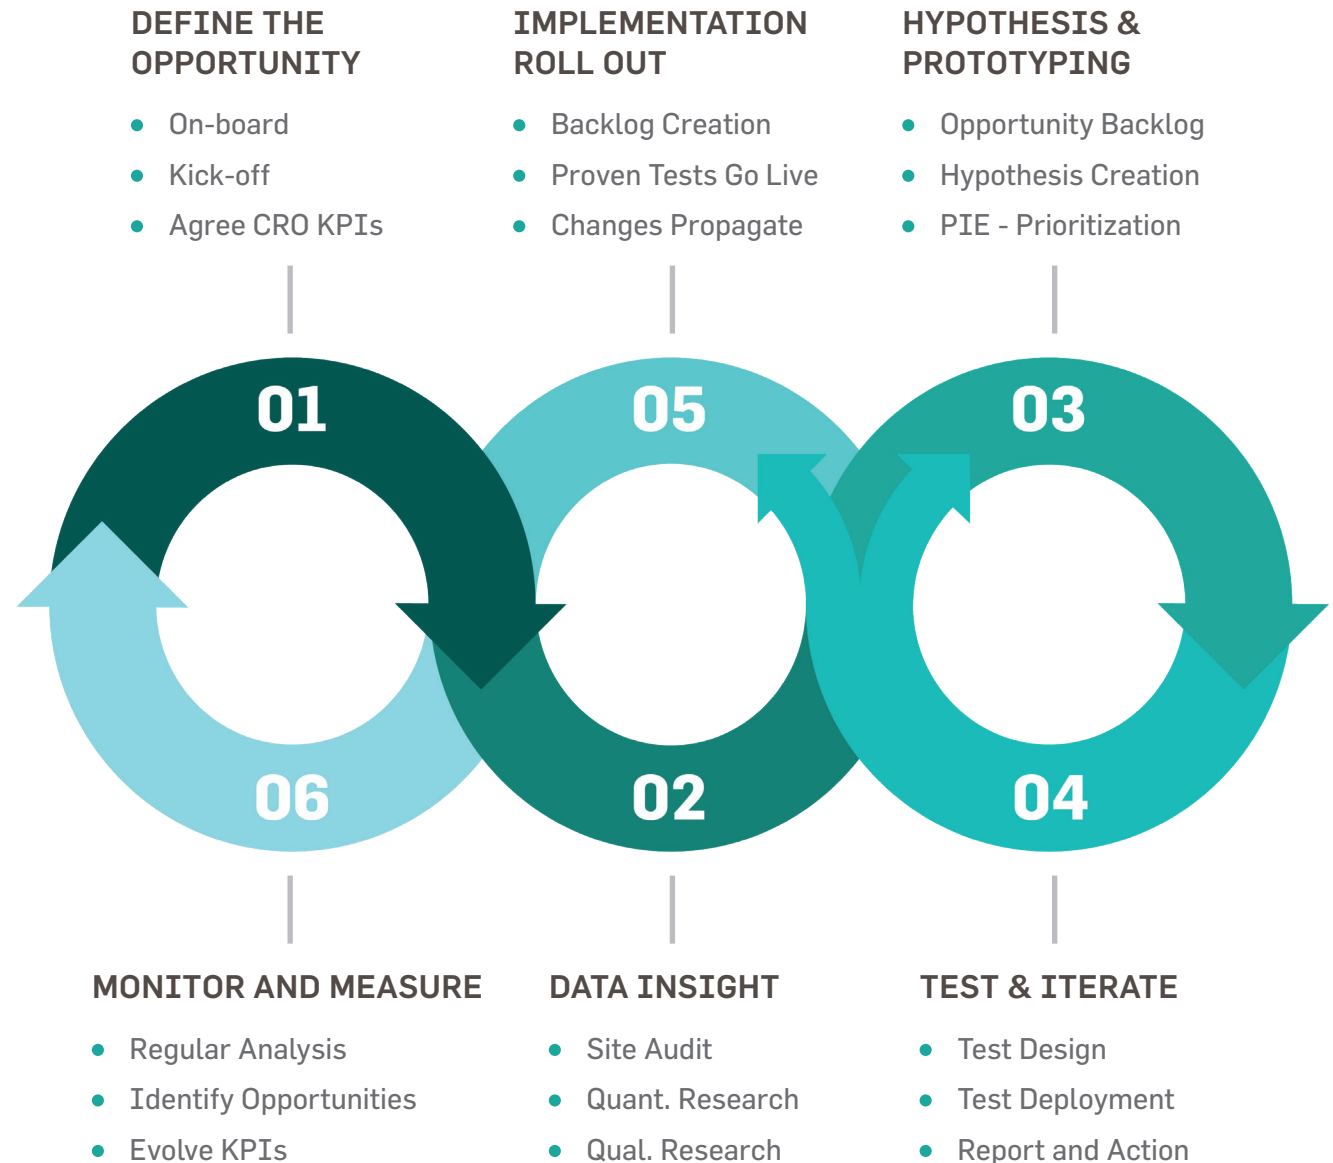

— Failure to align CRO with overall business objectives

— Lack of people with the right level of experience and skill

ZENSAR AND FOOLPROOF BRING TO YOU THE INFINITY CRO MODEL

Our Infinity CRO product is the culmination of nearly twenty years' experience of designing highly converting, fully optimized digital properties for our clients.

WHY TRUST YOUR CRO TO US?

We work as **optimization partners** to the **world's leading brands**. We go beyond data analysis, bringing together **researchers, behavioral scientists, designers and developers** to manage your optimization process end-to-end.

We combine **behavioral insight, customer data and creative thinking** to deliver the ideas that **increase your return** on digital spend. Our optimization work has made our clients millions in additional revenue.

We are **platform agnostic** but have all the tools required under one roof. We pick the **best tools** for your **individual** circumstances. We're **focused on outcomes**, helping budget holders unlock **investment** for longer term **customer experience initiatives**.
