

Future-proof your business processes with automation

Accelerate your cloud adoption journey
with Zensar's SAP Solutions

SAP holds the keys to the future

End-user spending on cloud services projected to grow 21.7% in 2022, with rapid global expansion of cloud adoption, according to Gartner. SAP as a leading Enterprise Resource Planning software plays a pivotal role in integrating cutting-edge technologies of tomorrow across business functions in the organizational value chain, becoming a preferred platform for accelerated digital transformation and cloud adoption. Irrespective of the size and scale of your operations, SAP solutions provide you with a robust, flexible and affordable transformation opportunities to scale your business onto the cloud.

Leverage the Zensar advantage

Digital transformation, as we see it today, is not just about technology. It's about identifying opportunities to address human needs through state-of-the-art design and innovation. To thrive in the modern marketplace, enterprises must evolve from doing digital to being digital, characterized by disruptive capabilities and a digital mindset that deliberately shapes every aspect of the business.

Integrating SAP solution offerings with our unique development and support ecosystem, we are bundling what companies need to holistically transform businesses for faster time-to-value, regardless of where they are in their digital transformation journey.

Whether you are using a legacy ERP system or SAP on-premises ERP system, or wanting to migrate to SAP S/4HANA Cloud to make your enterprise future-ready, Zensar's diversified SAP portfolio solutions can be customized to meet your needs, giving you a single-pane view into your organization's operational matrix.

Accelerate, Cloudify, Sustain, and Manage your enterprise applications with Zensar

Consulting & Advisory Services

From business process analysis & simplification to technical application rationalization, cloud migration and implementation to managed services, our Consulting and Advisory Services can be tailored to a broad spectrum of business and technology use cases.

SAP on Cloud

Access, Build, Migrate/Transform, Govern and Manage your cloud adoption journey with Zensar's 4-stage cloud adoption framework and unleash the true potential of the cloud.

Accelerating Enterprise

Our focus on S/4HANA Greenfield implementation, including Global template and rollouts and Brownfield S/4HANA conversions ensure you jump-start implementation of your Zensar SAP certified Solution, synthesizing SAP Best practices with Zensar's industry experience. We facilitate high velocity global rollouts using our rollout toolkits, while an Industrialized ADM factory setup helps drive S/4HANA conversions smoothly.

Sustain (NextGen Managed AM Services)

This service integrates Continuous Improvement with industrialization augmented by real-time dashboards, Sustainability Management Solutions and DevOps and Innovation. It provides our clients with the right platform to continuously improve their business processes and technology landscape, add value, save costs through automation, and drive a culture of innovation that provides the required agility and velocity to meet changing technology and business requirements.

Unlocking the value of SAP products

SAP S/4HANA

SAP S/4HANA is a complete ERP system with built-in intelligent technologies, including AI, ML and advanced analytics. Engage with our SAP digital transformation team today to understand the best approach for you and choose among Greenfield, Brownfield, Cloud or Hybrid solutions. Our team can help you chart a complete roadmap including design, implementation, and value realization with our AMS services.

SAP IBP

SAP Integrated Business Planning (IBP) is SAP's cloud-based solution for supply chain planning that helps improve efficiency and collaboration for your supply chain. With SAP IBP, Zensar can help you manage multiple end-to-end processes in real-time, building agility into your supply chain, enabling you to adapt to changing market conditions. Combined with predictive analytics, the solution can effectively simulate the effects of customer demand on your cost, capacity and profitability.

SAP C/4HANA

SAP C/4HANA delivers a comprehensive suite of solutions to support all front-office functions, including customer data protection, marketing, commerce, sales and customer service. Zensar offers any combination of these five cloud solutions based on your business needs in one integrated portfolio to deliver a unified, yet modular, suite of solutions. With SAP's C/4HANA suite of solutions, you can drive high customer lifetime value in an unrivalled manner.

SAP SuccessFactors

SAP SuccessFactors catalyzes transactional HCM processes to next-generation experiential Human Experience Management (HXM) that helps put employees first. Zensar can leverage the SuccessFactors HXM suite to provide a cloud-based friendly experience that conveys the care and priority you have for your workforce.

SAP Business Technology Platform

SAP Business Technology Platform (SAP BTP) brings together various aspects of enterprise applications along with their database and data management, analytics, integration and extension capabilities into one platform for both cloud and hybrid environments. SAP BTP can be deployed in any cloud environment, providing the flexibility and choice that enables you to compete and win with agility and speed. Zensar helps establish an effective platform with SAP BTP that allows clients to focus on business and customers while the platform takes care of the technology.

Jumpstart into the future with RISE with SAP

Zensar is an authorized reseller of RISE with SAP. Our diversified SAP portfolio comprises multiple products including S/4HANA and the surrounding ecosystem of cloud-native products such as Ariba, IBP, SuccessFactors, etc. SAP continues to be one of the dominant players in terms of market position and appetite. What's more, over 80% of SAP customers are SMEs, making SAP a preferred platform among small growing enterprises.

- Enable culture and mindset progression in your enterprise

Success Story

Client

A leading pharma research company headquartered in the U.S

Objectives

- To roll out existing SAP ECC solution in USA, Canada and Israel with localization requirements, with standardization and optimization of business processes across offices.
- The client sought to ensure system and process validation adherence to pharma best practices, maximizing returns on operation and maintenance investments.

Solution

- Zensar replaced existing legacy and standalone applications with synchronous bi-directional integration of the required third-party systems with SAP.
- Integrated machines with OPC server for automated production data collation using RF devices for all processes and WIP warehouse.
- Customized manufacturing and dispensing cockpit with intuitive screens minimized all manual activities.
- Seamless integration with various modules specially costing for labor time and manufacturing costs from Salesforce.

The Zensar Advantage

- Unified SAP system driven business process solution driving innovative solutions for improved processes and design.
- Increased operational efficiency, accuracy and speed on the shop-floor.
- Reduced risk and increased productivity through Zensar's proprietary automated tools and processes.
- Optimized Overall Equipment Effectiveness (OEE) by the integration of the OPC server (software program to convert communication with the machines).

Zensar for all your SAP needs

SAP is no longer just a technology, and software applications are no longer seen as simple process support but are an integral part of the business. For many medium-sized and large organizations, SAP is an application that impacts critical business processes. Make the right choices for your SAP environment now and in the future to ensure it adds value to your business, making digitalization a reality.

Is your current SAP landscape flexible and future-proof? Talk to us today to understand how you can derive the best from your SAP investments.
