robust cloud security  
with Zensar**

An  **RPG** Company

# Enterprise Cloud Security

Companies are rapidly moving to the cloud to achieve enterprise velocity (speed in the direction that realizes their vision). However, securing cloud environments, assets, and workloads remains a vulnerable area for security teams, discouraging organizations from exploring new opportunities and hampering enterprise velocity.

## Essential security solution requisites

- Rapid deployment
- Scalable and automated
- No manual dependencies

---

**Zensar's approach is based on three foundational pillars: time, cost, and risk.**

---

## Zensar's Cloud Security Solution

Zensar's Cloud Security Solution can meet critical security and compliance requirements without hindering the speed of your business. We help you balance security and flexibility to mitigate risks quickly, dynamically, and at scale while reducing operating costs.

## Solution benefits

- Better security in five minutes
- Lesser operating costs
- Lower security risks

## Key value-add

Protect in three easy steps:

### DISCOVER

Identify assets and security gaps in seconds with zero agents

### DEPLOY

One-click deployment of security in the cloud

### DEFEND

Configure adaptable, high-performance network security (NGFW/WAF/etc.)

# Secure your enterprise velocity

## Automate with infrastructure-as-code (IaC)

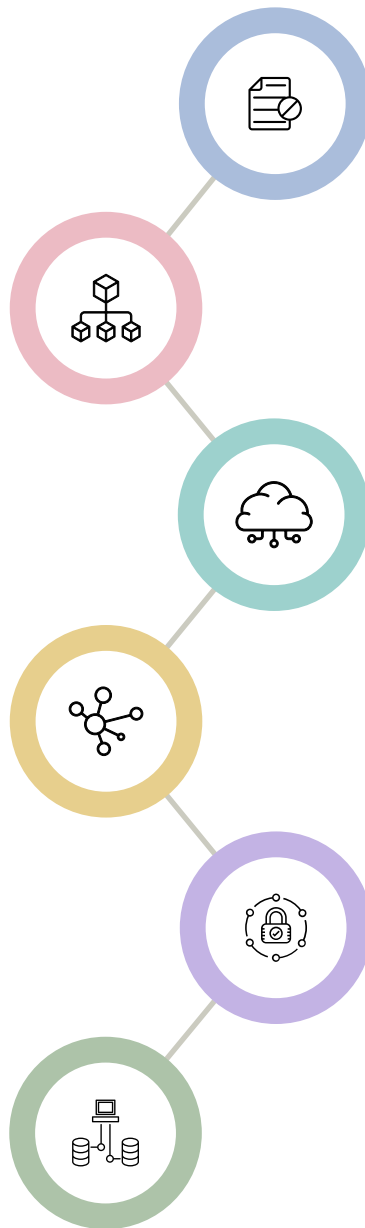

Ensure full support for infrastructure-as-code (IaC) through Terraform for automated deployment and policy application.

## Discover cloud assets

Empower teams with an updated source of truth about critical applications and assets across multiple cloud accounts and virtual networks.

## Enable detection and response

Forward network logs or security events to centralized data stores for analysis, correlation, and investigation.

## Mitigate zero-day vulnerabilities

Apply a policy restricting access to resources to reduce the attack surface. Block specific attacks via integrated threat intelligence.

## Protect platform services (PaaS)

Gain visibility and control of numerous cloud services from AWS, Azure, and GCP.

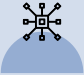

## Secure web apps and APIs

Secure your web applications and APIs against external threats, including OWASP Top 10, through an integrated web application firewall (WAF).

# Why Zensar's Cloud Security Solution?

Zensar's Cloud Security Solution is the first and only cloud network security platform delivered as a service that enables cloud teams to meet the most stringent security requirements in a simple, cloud-first way.

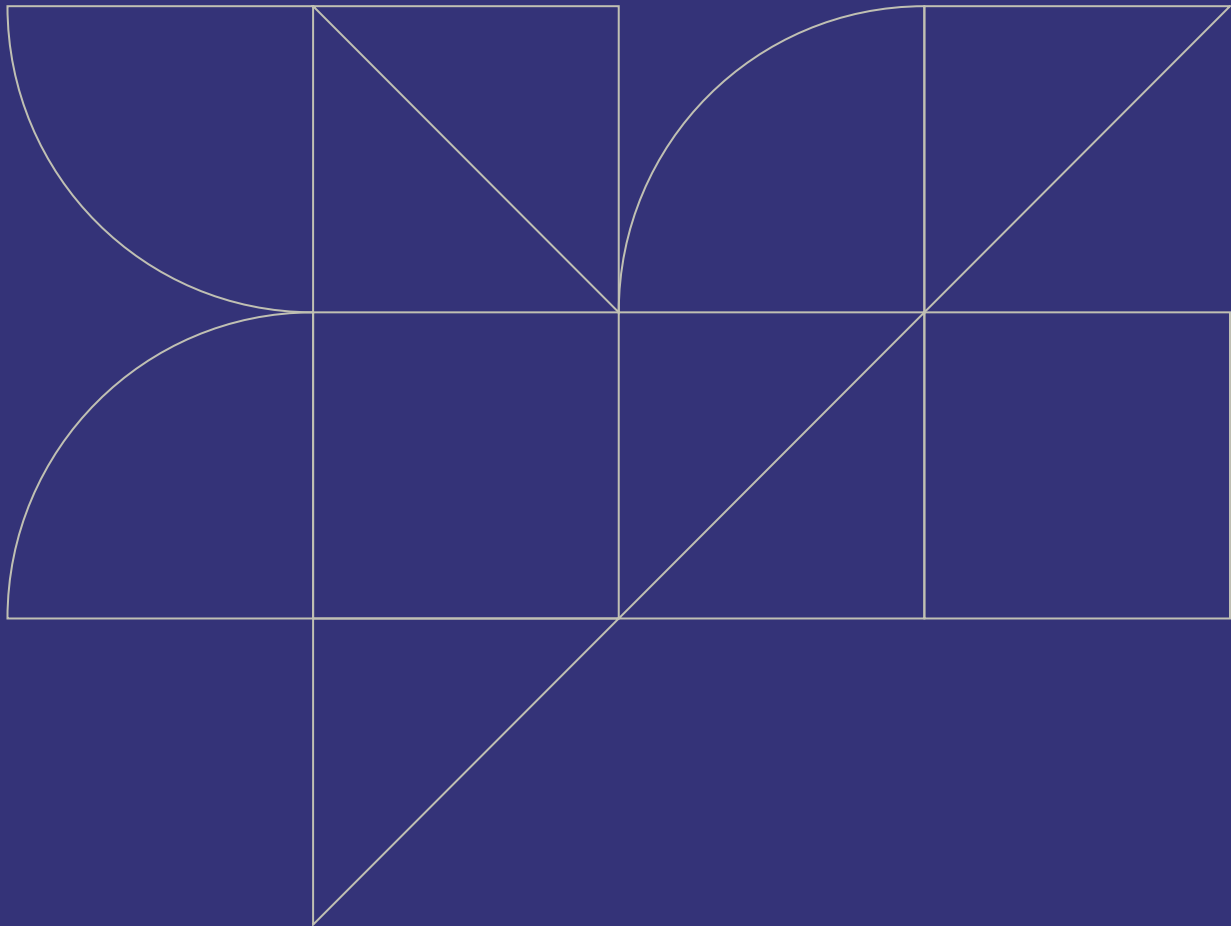

## Impact

 <p>Single Cloud / Multi-Cloud security in 5 min with no hyperscaler lock-in</p>	 <p>Reduction of Cloud Network security cost by up to 50%</p>	 <p>Attain 100 percent security coverage through continuous discovery</p>
 <p>Achieve 90 percent reduction in deployment speeds with IAC</p>	 <p>Gain continuous visibility into applications, cloud networks (VPC/VNET), network traffic logs, indicators of compromise, and geolocation, among others</p>	

## Why Zensar

 <p>Highly-skilled SMEs with an average experience of 13+ years</p>	 <p>55+ years of technology consulting and services expertise</p>
 <p>400+ clients across industries and verticals</p>	 <p>11,500+ employees across 30+ global locations</p>
 <p>Collaborative partnership for shared ownership and minimal risk</p>	 <p>Deep knowledge of industry and cloud security best practices</p>

If you would like to explore how Zensar can secure your cloud environment so you achieve enterprise velocity, please write to us at [cloud\\_transform@zensar.com](mailto:cloud_transform@zensar.com).

# zensar

An  RPG Company

We conceptualize, build, and manage digital products through experience design, data engineering, and advanced analytics for over 130 leading companies. Our solutions leverage industry-leading platforms to help our clients be competitive, agile, and disruptive while moving with velocity through change and opportunity.

With headquarters in Pune, India, our 10,000+ associates work across 33 locations, including San Jose, Seattle, Princeton, Cape Town, London, Singapore, and Mexico City.
