Transforming operational efficiency of a UK based Global Food Manufacturer with Intelligent Automation

CASE STUDY

The client is a UK based Global Food Manufacturing company with a strong workforce of 23,000 people and revenue worth £3.5b. The client is on a mission to deliver great quality food to its wide group of customers across Europe. Led by Zensar, It witnessed a spurt in their savings, scaled and expanded its numbers phenomenally with our Robotics Process Automation Solution. The client’s journey of transformation is now driven by greater focus on their core offerings, strengthening their management team and improving operational performance. We continue to transform their business through intelligent automation of financial processes.

Challenges

The organization faced multiple problems like unstructured data, multiple touchpoints, ERPs and applications – SAP, Netsuite, AS400. The client’s mainframe processes were manual, complex and error prone.

Processes automated

Using Zensar’s ValuePlus Framework, we automated processes like Cash Allocation & Posting, Invoice Processing, Manual Billing, Vendor Reconciliation, Credit Note Creation & Allocation.

IPA Value delivered
