

ZenSār

CASE STUDY

Zensar's Enterprise Modernization employing 3Rs: Refactoring, Reduction and Rationalization

Company:

Client is a leading pan-African bank which provides wholesale and retail banking services, insurance, asset management and wealth management offerings. The company's segments include retail, corporate and investment banking. The rest of Africa business is responsible for the company's banking operations and expansion activities.

Challenges

- Very complex systems
- Long batch runs
- Unable to keep up with business demands

Solution

- Refactored Legacy system
- Reduced complexity of legacy
- Rationalized interfaces
