Report on special purpose financial statements

1. This report is issued in accordance with the terms of our agreement dated December 21, 2016.
2. We have audited the accompanying special purpose Ind AS financial statements of Zensar Technologies UK Limited (the “Company”) which comprise the Balance Sheet as at March 31, 2017, the Statement of Profit and Loss (including Other Comprehensive Income), the Cash flow statement and the Statement of Change in Equity for the year ended on that date and a summary of significant accounting policies and other explanatory information, which we have signed under reference to this report.

Management’s Responsibility for the special purpose Ind AS Financial Statements

3. Management is responsible for the preparation of these special purpose Ind AS financial statements as mentioned above to give a true and fair view of the financial position, financial performance (including comprehensive income), cash flows and change in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified in the Companies (Indian Accounting Standards) Rules, 2015 (as amended) under Section 133 of the Companies Act, 2013 to the extent considered relevant by it for the purpose for which these special purpose financial statements have been prepared. The responsibility includes the design, implementation and maintenance of internal control relevant to the preparation of special purpose Ind AS financial statements that are free from material misstatement, whether due to fraud or error.

Auditors’ Responsibility

4. Our responsibility is to express an opinion on these special purpose Ind AS financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Companies Act, 2013 (“the Act”) and other applicable authoritative pronouncements issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Ind AS financial statements are free from material misstatement.
5. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the special purpose Ind AS financial statements. The procedures selected depend on the auditors’ judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity’s preparation and fair presentation of the Ind AS financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by Management, as well as evaluating the overall presentation of the Ind AS financial statements.

6. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

7. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements together with the notes thereon and attached thereto, give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the company, as at March 31, 2017, and its Statement of Profit and Loss (including other comprehensive income), its cash flows and the change in equity for the year ended on that date.

Emphasis of Matter – Basis of Preparation

8. We draw attention to Note 2(a) to the special purpose Ind AS financial statements, which describes the basis of its preparation. The special purpose Ind AS financial statements are not the statutory financial statements of the Company, and are not intended to, and do not, comply with the disclosure provisions applicable to statutory financial statements prepared under the Companies Act, 2013, as those are considered irrelevant by the Management and the intended users of the special purpose Ind AS financial statements for the purposes for which those have been prepared. Our opinion is not qualified in respect of this matter.

Other Matter

9. The special purpose Ind AS financial statements dealt with by this report, have been prepared for the express purpose of the information and use of management and Board of Directors in their preparation of Consolidated Ind AS Financial Statements of the parent company in order to comply with the Regulation 34 of the Listing Regulation 2015.
10. The comparative financial information of the Company for the year ended March 31, 2016 and the transition date opening balance sheet as at April 1, 2015 included in these standalone Ind AS financial statements, are based on the previously issued special purpose financial statements for the years ended March 31, 2016 and March 31, 2015 prepared in accordance with the Companies (Accounting Standards) Rules, 2006 (as amended) which were audited by us, on which we expressed an unmodified opinion dated April 22, 2016 and April 28, 2015 respectively. The adjustments to those financial statements for the differences in accounting principles adopted by the Company on transition to the Ind AS have been audited by us. Our Opinion is not qualified in respect of this matter.

Restriction on Use

11. Our obligations in respect of this report are entirely separate from, and our responsibility and liability is in no way changed by, any other role we may have (or may have had) as auditors of the Company or otherwise. Nothing in this report, nor anything said or done in the course of or in connection with the services that are the subject of this report, will extend any duty of care we may have in our capacity as auditors of any Ind AS financial statements of the Company.

12. This report is addressed to the Board of Directors of Zensar Technologies Limited and has been prepared for and only for the purposes set out in paragraph 9 above. This report should not be otherwise used or shown to or otherwise distributed to any other party or used for any other purpose except with our prior consent in writing. Price Waterhouse neither accepts nor assumes any duty, responsibility or liability to any other party or for any other purpose.

Zensar Technologies (UK) Limited

Notes to the Financial Statements as at and for the year ended March 31, 2017

1. General Information

Zensar Technologies (UK) Ltd ('the company') develops, designs, supplies, installs and programmes computer software and systems. The company operates predominantly in the UK and Europe. The company is incorporated and domiciled in the UK. The address of its registered address is Thames Central, 8th Floor, North Suite, Hatfield Road, Slough, SL1 1QE

2. Summary of significant accounting policies

a. Basis of preparation

The Special Purpose Financial Statements are prepared for the purposes of the information and use of management and the Board of Directors in its preparation of the Consolidated Financial Statements of the Holding Company, Zensar Technologies Limited.

(i) Compliance with Ind AS:

The financial statements comply in all material aspects with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the Act) [Companies (Indian Accounting Standards) Rules, 2015] and other relevant provisions of the Act.

The financial statements up to year ended March 31, 2016 were prepared in accordance with the accounting standards notified under Companies (Accounting Standards) Rules, 2006 (as amended) and other relevant provisions of the Act.

The financial statements are the first financial statements of the Company under Ind AS. Refer note 26 for an explanation of how the transition from previous GAAP to Ind AS has affected the Company's financial position, financial performance and cash flows.

(ii) Historical cost convention:

The financial statements have been prepared on a historical cost basis, except for the following:

- certain financial assets and liabilities are measured at fair value;
- defined benefit plans - plan assets measured at fair value;

All assets and liabilities have been classified as current or non-current as per the Company's operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of products and services and their realisation in cash and cash equivalents, the Company has ascertained its operating cycles as 12 months for the purpose of current - non current classification of assets and liabilities.

b. Foreign Currency Translation

(i) Functional and presentation currency:

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The functional currency for the Company is Great Britain Pounds. However, as the Company is a subsidiary of Zensar Technologies Limited, a company registered in India, the Financial Statements are prepared in Indian Rupees for the consolidation purpose.

(ii) Transactions and balances

- Transactions in foreign currency are translated into the respective functional currencies using the exchange rates prevailing at the date of the transaction. Foreign exchange gains and losses resulting from the settlement of such transactions and from translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognized in the statement of profit and loss and reported within foreign exchange gains/(losses), net within results of operating activities except when deferred in other comprehensive income as qualifying cash flow hedges and qualifying net investment hedges.

- Foreign exchange differences regarded as an adjustment to borrowing costs are presented in the statement of profit and loss, within finance costs.

- Non-monetary assets and non-monetary liabilities denominated in a foreign currency and measured at fair value are translated at the exchange rate prevalent at the date when the fair value was determined. Non-monetary assets and non-monetary liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

c. Revenue Recognition

The Company derives revenue primarily from software development, maintenance of software/hardware and related services, and sale of software licenses.

Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are net of trade allowances, rebates, discounts, value added taxes and other amounts collected on behalf of third parties.

The company recognised revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and specific criteria have been met for each of the company's activities as described below. The Company estimates its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

(i) Time and material contracts:

Revenue and costs relating to time and materials contracts are recognized as the related services are rendered.

(ii) Fixed-price contracts:

Revenues from fixed-price contracts, including IT Infrastructure development and integration contracts are recognized using the "percentage-of-completion" method. Percentage of completion is determined based on project costs incurred to date as a percentage of total estimated project costs required to complete the project. The cost expended method has been used to measure progress towards completion as there is a direct relationship between input and productivity. If the Company does not have a sufficient basis to measure the progress of completion or to estimate the total contract revenues and costs, revenue is recognized only to the extent

of contract cost incurred for which recoverability is probable.

When total cost estimates exceed revenues in an arrangement, the estimated losses are recognized in the statement of income in the period in which such losses become probable based on the current contract estimates.

'Unbilled revenues' represent cost and earnings in excess of billings as at the end of the reporting period. 'Unearned revenues' represent billing in excess of revenue recognized. Advance payments received from customers for which no services have been rendered are presented as 'Advance from customers'.

(iii) Maintenance contracts:

Revenue from maintenance contracts is recognized ratably over the period of the contract using the percentage of completion method. When services are performed through an indefinite number of repetitive acts over a specified period of time, revenue is recognized on a straight-line basis over the specified period unless some other method better represents the stage of completion.

In certain projects, a fixed quantum of service or output units is agreed at a fixed price for a fixed term. In such contracts, revenue is recognized with respect to the actual output achieved till date as a percentage of total contractual output. Any residual service unutilized by the customer is recognized as revenue on completion of the term.

(iv) Sale of License

Revenue from sale of licenses and support are recognized when the significant risks and rewards of ownership have been transferred to the buyer, continuing managerial involvement usually associated with ownership and effective control have ceased, the amount of revenue can be measured reliably, it is probable that economic benefits associated with the transaction will flow to the Company and the costs incurred or to be incurred in respect of the transaction can be measured reliably.

(v) Volume Discount

The Company accounts for volume discounts to customers as a reduction of revenue based on the ratable allocation of discount amount to each of the underlying revenue transactions that result in progress by the customer towards earning the discount. Also, when the level of discount varies with increases in levels of revenue transactions, the Company recognises the liability based on its estimate of the customer's future purchases. If it is probable that the criteria for the discount will not be met, or if the amount thereof cannot be estimated reliably, then the discount is not recognised until the payment is probable and the amount can be estimated reliably. The Company recognises changes in the estimated amount of obligations for discounts using a cumulative catch-up approach. The discounts are passed on to the customer or as a reduction of payments due from the customer.

d. Income Tax

Income tax comprises current and deferred tax. Income tax expense is recognized in the statement of income except to the extent it relates to a business combination, or items directly recognized in equity or in other comprehensive income.

(i) Current Income Tax:

Current income tax for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the taxable income for the period. The tax rates and tax laws used to compute the current tax amount are those that are enacted or substantively enacted as at the reporting date and applicable for the period.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and liability simultaneously.

(ii) Deferred Income Tax:

Deferred income tax is recognized using the balance sheet approach. Deferred income tax assets and liabilities are recognized for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount in financial statements, except when the deferred income tax arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profits or loss at the time of the transaction.

Deferred income tax assets are recognized to the extent it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized.

Deferred income tax liabilities are recognized for all taxable temporary differences except in respect of taxable temporary differences associated with investments in subsidiaries where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

The Company offsets deferred income tax assets and liabilities, where it has a legally enforceable right to offset current tax assets against current tax liabilities, and they relate to taxes levied by the same taxation authority on either the same taxable entity, or on different taxable entities where there is an intention to settle the current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

e. Leases

As a lessee:

Finance Lease: Leases of property, plant and equipment, where the Company assumes substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalized at lower of the fair value of the leased property and the present value of the minimum lease payments. Lease payments are apportioned between the finance charge and the outstanding liability. The finance charge is allocated to periods during the lease term at a constant periodic rate of interest on the remaining balance of the liability.

Operating lease: Leases where the lessor retains substantially all the risks and rewards of ownership are classified as operating leases. Payments made under operating leases are recognized in the statement of income on a straight-line basis over the lease term unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

Deposits provided to lessors: The Company is generally required to pay refundable security deposits in order to obtain property leases from various lessors. Such security deposits are financial assets are recorded at fair value on initial recognition. The difference between the initial fair value and the refundable amount of the deposit is recognized as a lease prepayment. The initial fair value is estimated as the present value of the refundable amount of security deposit, discounted using the market interest rates for similar instruments.

Subsequent to initial recognition, the security deposit is measured at amortized cost using the effective interest method with the carrying amount increased over the lease period up to the refundable amount. The amount of increase in the carrying amount of deposit is recognized as interest income. The lease prepayment is amortized on a straight line basis over the lease term as lease rental expense.

f. Impairment of assets

Goodwill and intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units).

Non financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

g. Cash and Cash Equivalents

For the purposes of presentation in the statement of cash flows, cash and cash equivalents include cash on hand, in banks and demand deposits with financial institutions, other short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to insignificant change in value.

h. Trade Receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

i. Investments and other financial assets

(i) Classification

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit and loss), and
- those measured at amortised cost

The classification depends on the entity's business model for managing the financial assets and the contractual cash flow characteristics.

(ii) Initial Recognition

All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

(iii) Measurement

Financial assets carried at amortised cost:

A financial asset is subsequently measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income:

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Further, in cases where the Company has made an irrevocable election based on its business model, for its investments which are classified as equity instruments, the subsequent changes in fair value are recognized in other comprehensive income.

Financial assets at fair value through profit or loss:

A financial asset which is not classified in any of the above categories are subsequently fair valued through profit or loss.

(iv) **Impairment of financial assets**

The Company recognizes loss allowances using the expected credit loss(ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of expected credit losses(or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized is recognized as an impairment gain or loss in profit or loss.

(v) **Derecognition of financial assets**

The Company derecognizes a financial asset when

- the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under IFRS 9.
- retains contractual rights to receive the cash flows of the financial asset but assumes a contractual obligation to pay the cash flows to one or more recipients.

When the entity has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognised if the Company has not retained control of the financial asset. Where the Company retains control of the financial asset, the asset is continued to be recognised to extent of continuing involvement in the financial asset.

(vi) **Income Recognition**

Interest Income:

Interest income from debt instruments is recognised using the effective interest rate (EIR) method. EIR is the rate that exactly discounts the estimated future cash receipts over the expected life of the financial asset or a shorter period, where appropriate, to the gross carrying amount of the financial asset. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses.

Interest income is included in finance income in the statement of profit and loss.

Dividends

Dividends are recognised in profit or loss only when the right to receive the payment is established, which is generally when shareholders approve the dividend, it is probable that the economic benefits associated with the dividend will flow to the Company and the amount of dividend can be measured reliably.

(vi) **Investments in subsidiaries:** The Company has accounted for its investment in subsidiaries at cost.

j. **Financial Liabilities**

(i) **Initial recognition and measurement**

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value.

The Company's financial liabilities include trade and other payables.

(ii) **Subsequent Measurement**

The subsequent measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss:

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit and loss.

Trade and other payables:

These amounts represent liabilities for goods and services provided to the group prior to the end of financial year which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

(iii) **Derecognition**

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

k. **Offsetting financial instruments**

Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

l. **Property, plant and equipment**

(i) **Recognition and measurement**

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses, if any. Cost includes expenditures directly attributable to the acquisition of the asset.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment. Subsequent expenditure relating to property, plant and equipment is capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably.

The carrying amount of any component accounted for as a separate asset is derecognised when replaced.

All other repairs and maintenance costs are charged to profit and loss in the reporting period in which they occur.

(ii) **Transition to Ind AS**

On transition to Ind AS, the Company has decided to continue with the carrying value of all its property, plant and equipment recognised as at April 1, 2015 as per the previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

(iii) **Depreciation**

The Company depreciates property, plant and equipment on a straight-line basis as per the useful lives prescribed under Schedule II of the Companies Act, 2013 except in respect of the following assets where, useful life of assets have been determined based on technical evaluation done by the management's expert:

Class of asset	Useful life as per Schedule II	Useful life as followed by the Company
Server and networking equipment	6 years	4 years

m. Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to passage of time is recognised as interest expense.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognized as an asset, if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

n. Employee benefits

(i) Post-employment and pension plans

The Company participates in various employee benefit plans. Pensions and other post-employment benefits are classified as either defined contribution plans or defined benefit plans. Under a defined contribution plan, the Company's only obligation is to pay a fixed amount with no obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits. The related actuarial and investment risks fall on the employee. The expenditure for defined contribution plans is recognized as an expense during the period when the employee provides service. Under a defined benefit plan, it is the Company's obligation to provide agreed benefits to the employees. The related actuarial and investment risks fall on the Company. The present value of the defined benefit obligations is calculated by an independent actuary using the projected unit credit method.

The Company has the following employee benefit plans:

(ii) Compensated absences:

The employees of the Company are entitled to compensated absences. The employees can carry forward a portion of the unused accumulating compensated absences and utilize it in future periods or receive cash at retirement or termination of employment. The Company records an obligation for compensated absences in the period in which the employee renders the services that increases this entitlement.

Accumulated compensated absences, which are expected to be availed or encashed within 12 months from the end of the year are treated as short term employee benefits. The obligation towards the same is measured at the expected cost of accumulating compensated absences as the additional amount expected to be paid as a result of the unused entitlement as at the year end.

Accumulated compensated absences, which are expected to be availed or encashed beyond 12 months from the end of the year are treated as other long term employee benefits. The Company's liability is actuarially determined (using the Projected Unit Credit method) at the end of each year. Actuarial losses/ gains are recognised in the Statement of Profit and Loss in the year in which they arise.

(iii) Share-based payments:

Selected employees of the Company receive remuneration in the form of equity settled instruments, for rendering services over a defined vesting period. Equity instruments granted are measured by reference to the fair value of the instrument at the date of grant.

The expense is recognized in the statement of income with a corresponding increase to the share based payment reserve, a component of equity.

The equity instruments generally vest in a graded manner over the vesting period. The fair value determined at the grant date is expensed over the vesting period of the respective tranches of such grants (accelerated amortisation). The stock compensation expense is determined based on the Company's estimate of equity instruments that will eventually vest.

o. Contributed Equity

Equity shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from proceeds.

p. Dividends

Provision is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the entity, on or before the end of the reporting period but not distributed at the end of the reporting period.

q. Earnings per share

The basic earnings per share is computed by dividing the net profit for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The number of shares used in computing diluted earnings per share comprises the weighted average shares considered for deriving basic earnings per share and also the weighted average number of equity shares which would have been issued on the conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period unless they have been issued at a later date.

r. Rounding of amounts

All amounts disclosed in the financial statements and notes have been rounded off to nearest lakhs as per the requirement of Schedule III, unless otherwise stated.

Standards issued but not yet effective

In March 2017, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) (Amendments) Rules, 2017, notifying amendments to Ind AS 7, 'Statement of cash flows' and Ind AS 102, 'Share-based payment.' These amendments are in accordance with the recent amendments made by International Accounting Standards Board (IASB) to IAS 7, 'Statement of cash flows' and IFRS 2, 'Share-based payment,' respectively. The amendments are applicable to the company from April 1, 2017.

Amendment to Ind AS 7:

The amendment to Ind AS 7 requires the entities to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes, suggesting inclusion of a reconciliation between the opening and closing balances in the balance sheet for liabilities arising from financing activities, to meet the disclosure requirement.

The company is evaluating the requirements of the amendment and the effect on the financial statements is being evaluated.

Amendment to Ind AS 102:

The amendment to Ind AS 102 provides specific guidance to measurement of cash-settled awards, modification of cash-settled awards and awards that include a net settlement feature in respect of withholding taxes.

It clarifies that the fair value of cash-settled awards is determined on a basis consistent with that used for equity-settled awards. Market-based performance conditions and non-vesting conditions are reflected in the 'fair values', but non-market performance conditions and service vesting conditions are reflected in the estimate of the number of awards expected to vest. Also, the amendment clarifies that if the terms and conditions of a cash-settled share-based payment transaction are modified with the result that it becomes an equity-settled share-based payment transaction, the transaction is accounted for as such from the date of the modification. Further, the amendment requires the award that include a net settlement feature in respect of withholding taxes to be treated as equity-settled in its entirety. The cash payment to the tax authority is treated as if it was part of an equity settlement.

The company is evaluating the requirements of the amendment and the impact on the financial statements is being evaluated.

Zensar Technologies (UK) Limited
Notes to the Financial Statements as at and for the year ended March 31, 2017

3. Critical estimates and judgements

The preparation of the financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from those estimates.

This note provides an overview of the areas that involved a higher degree of judgement or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgements is included in relevant notes together with information about the basis of calculation of each affected line item in the financial statements.

The areas involving critical estimates and/or judgements are:

- Fair valuation of unlisted securities - Note 23
- Revenue Recognition- Note 15
- Impairment of trade receivable - Note 5

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

The areas involving critical estimates and/or judgements are:

a Revenue Recognition

The Company uses the percentage-of-completion method in accounting for its fixed-price contracts. Use of the percentage-of-completion method requires the Company to estimate the efforts or costs expended to date as a proportion of the total efforts or costs to be expended. Efforts or costs expended have been used to measure progress towards completion as there is a direct relationship between input and productivity. Provisions for estimated losses, if any, on uncompleted contracts are recorded in the period in which such losses become probable based on the expected contract estimates at the reporting date.

b Impairment of trade receivable

The Company estimates the uncollectability of accounts receivable by analyzing historical payment patterns, customer concentrations, customer credit-worthiness and current economic trends. If the financial condition of a customer deteriorates, additional allowances may be required.

26 First time adoption of Ind AS**Transition to Ind AS**

These are the Company's first financial statements prepared in accordance with Ind AS.

The accounting policies set out in note 2 have been applied in preparing the financial statements for the year ended 31 March 2017, the comparative information presented in these financial statements for the year ended 31 March 2016 and in the preparation of an opening Ind AS balance sheet at 1 April, 2015. In preparing its opening Ind AS balance sheet, the Company has adjusted the amounts reported previously in financial statements prepared in accordance with the accounting standards notified under Companies (Accounting Standards) Rules, 2006 (as amended) and other relevant provisions of the Act (previous GAAP or Indian GAAP). In its transition from previous GAAP to Ind AS, the Company has also availed certain optional exemptions and mandatory exceptions in accordance with Ind AS 101. An explanation of how this transition has affected the company's financial performance and cash flows is set out in the following tables and notes.

(a) Exemptions from retrospective application:**aa Deemed cost**

Ind AS 101 permits a first-time adopter to elect to continue with the carrying value for all of its property, plant and equipment as recognised in the financial statements as at the date of transition to Ind AS, measured as per the previous GAAP and use that as its deemed cost as at the date of transition after making necessary adjustments for de-commissioning liabilities. This exemption can also be used for intangible assets covered by Ind AS 38 Intangible Assets.

Accordingly, the Company has elected to measure all of its property, plant and equipment and intangible assets at their previous GAAP carrying value.

ab Cumulative translation differences

Ind AS 101 permits cumulative translation gains and losses to be reset to zero at the transition date. This provides relief from determining cumulative currency translation differences in accordance with Ind AS 21 from the date a foreign operation was formed or acquired.

The Company elected to reset all cumulative translation gains and losses to zero by transferring it to opening retained earnings at its transition date.

The other exemptions either do not apply or are not relevant for the Company.

(b) Mandatory exceptions

ba Estimates

An entity's estimate on the date of transition to Ind AS shall be consistent with estimates made for the same date in accordance with previous GAAP (after adjustments to reflect any difference in accounting policies), unless there is objective evidence that those estimates were in error.

Ind AS estimates as at 1 April 2015 are consistent with the estimates as at the same date made in conformity with previous GAAP.

The Company has made estimates for the following items in accordance with Ind AS as on the date of transition, as these were not required under previous GAAP.

- Impairment of financial assets based on expected credit loss model.

bb De-recognition of financial assets and liabilities

Ind AS 101 requires a first-time adopter to apply the de-recognition provisions of Ind AS 109 prospectively for transactions occurring on or after the date of transition to Ind AS. However, Ind AS 101 allows a first-time adopter to apply the de-recognition requirements under Ind AS 109, prospectively from a date of the entity's choosing, provided that the information needed to apply Ind AS 109 to financial assets and financial liabilities derecognised as a result of past transactions was obtained at the time of initially accounting for those transactions.

The Company has elected to apply the de-recognition provisions of Ind AS 109 prospectively from the date of transition to Ind AS.

bc Classification and measurement of financial assets

As required under Ind AS 101, the Company has classified and measured the financial assets on the basis of the facts and circumstances existing at the date of transition to Ind AS.

(c) Reconciliations between previous GAAP and Ind AS

The following reconciliations provide a quantification of the effect of significant differences arising from the transition from Previous GAAP to Ind AS in accordance with Ind AS 101:

- equity as at April 1, 2015;
- equity as at March 31, 2016;
- total comprehensive income for the year ended March 31, 2016; and
- explanation of material adjustments to cash flow statements.

In the reconciliations mentioned above, certain reclassifications have been made to Previous GAAP financial information to align with the Ind AS presentation.

ca Reconciliation of equity as at April 1, 2015

Cash and cash equivalents as at March 31, 2016		-	-	6,614.79

cf Notes to first time adoption

Note 1: Foreign currency translation reserve

The Company elected to reset the balance appearing in the foreign currency translation reserve to zero as at April 1, 2015. Accordingly, translation reserve balance under previous GAAP of Rs. 273.23 has been transferred out of retained earnings. There is no impact on total equity as a result of this adjustment.

Note 2: Security deposits

Under the previous GAAP, interest free lease security deposits (that are refundable in cash on completion of the lease term) are recorded at their transaction value. Under Ind AS, all financial assets are required to be recognised at fair value. Accordingly, the group has fair valued these security deposits under Ind AS. Difference between the fair value and transaction value of the security deposit has been recognised as prepaid rent. Consequent to this change, the amount of security deposits decreased by Rs. 0.15 as at March 31, 2016 (April 1, 2015 - Rs. 7.79). The prepaid rent increased by Rs. 1.21 as at March 31, 2016 (April 1, 2015 - Rs. 7.79). There was no impact on total equity as at April 1, 2015. The profit for the year and total equity as at March 31, 2016 decreased by Rs. 0.11 due to amortisation of the prepaid rent of Rs. 6.58 which is partially off-set by the notional interest income of Rs. 6.46 recognised on security deposits.

Note 3: Deferred tax

Indian GAAP requires deferred tax accounting using the income statement approach, which focuses on differences between taxable profits and accounting profits for the period. Ind AS 12 requires entities to account for deferred taxes using the balance sheet approach, which focuses on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base. The application of Ind AS 12 approach has resulted in recognition of deferred tax on new temporary differences which was not required under Indian GAAP. In addition, the various transitional adjustments lead to temporary differences. Deferred tax adjustments are recognised in correlation to the underlying transaction either in retained earnings or a separate component of equity. Consequently the net deferred tax asset as at March 31, 2016 increased by Rs. 1.18, the profit and total comprehensive income for the year ended March 31, 2016 increased by Rs. 1.18.

Note 4: Employee benefits

Under the previous GAAP, the rate used to discount post-employment benefit obligations of the Company, was determined by reference to market yields at the end of the reporting period on government bonds/securities. Ind AS 19, Employee Benefits requires the discounting of such obligations using the rate determined by reference to market yield at the end of the reporting period on high quality corporate bonds. Consequently, the discounting of liability using corporate bond rates has resulted in an increase in liability as at March 31, 2016 by Rs. 5.61 (April 1, 2015 - increase by Rs. 53.47) and decrease in profit for the year then ended by Rs. 59.08.

Note 5: Retained earnings

Retained earnings as at April 1, 2015 has been adjusted consequent to the above Ind AS transition adjustments.

Note 6: Other comprehensive income

Under Ind AS, all items of income and expense recognised in a period should be included in profit or loss for the period, unless a standard requires or permits otherwise. Items of income and expense that are not recognised in profit or loss but are shown in the statement of profit and loss as other comprehensive income include remeasurements of defined benefit plans, foreign exchange differences arising on translation of foreign operations and effective portion of gains and losses on cash flow hedging instruments. The concept of other comprehensive income did not exist under previous GAAP.

Zensar Technologies (UK) Limited
Notes to the Financial Statements as at and for the year ended March 31, 2017
(All amounts are in INR Lakhs, unless otherwise stated)

27 Financial risk management

The Company's activities expose it to a variety of financial risks: market risk, credit risk and liquidity risk. The Company's primary focus is to foresee the unpredictability of financial markets and seek to minimize potential adverse effects on its financial performance. The primary market risk to the Company is foreign exchange risk. The Company's exposure to credit risk, excluding receivables from related parties, is influenced mainly by the individual characteristic of each customer and the concentration of risk from the top few customers. The demographics of the customer including the default risk of the industry and country in which the customer operates also has an influence on credit risk assessment.

(a) Market Risk

The Company operates internationally and a major portion of the business is transacted in several currencies and consequently the Company is exposed to foreign exchange risk through its sales and services in the United States, Austria, Switzerland, and elsewhere, and purchases from overseas suppliers in various foreign currencies. The exchange rate between the rupee and foreign currencies has changed substantially in recent years and may fluctuate substantially in the future. Consequently, the results of the Company's operations are affected positively/adversely as the rupee appreciates/ depreciates against these currencies. The Company evaluates exchange rate exposure arising from these transactions and enters into foreign exchange forward contracts to mitigate the risk of changes in exchange rates on foreign currency exposures. The Company follows established risk management policies, to hedge forecasted cash flows denominated in foreign currency.

aa The Company's exposure to foreign currency risk as of March 31, 2017 expressed in INR, is as follows:

	March 31, 2017			
	USD	EUR	CHF	Total
Financial assets				
Cash and cash equivalents	1,572.70	1,634.36	12.83	3,219.89
Trade receivables	494.14	307.62	-	801.76
Unbilled revenue	476.42	557.06	-	1,033.48
Financial liabilities				
Trade payables	-	216.13	120.21	336.34
Employee benefit obligations			5.24	5.24
Other liabilities		3.72	2.51	6.23
Net assets / (liabilities)	2,543.26	2,279.19	(115.14)	4,707.32

ab The Company's exposure to foreign currency risk as of March 31, 2016 expressed in INR, is as follows:

	March 31, 2016			
	USD	EUR	CHF	Total
Financial assets				
Cash and cash equivalents	632.36	855.07	-	1,487.43
Trade receivables	491.57	270.90	-	762.47
Unbilled revenue	668.33	485.68	-	1,154.01
Financial liabilities				
Trade payables	-	68.81	17.74	86.55
Employee benefit obligations		19.92		19.92
Other liabilities		4.64	0.61	5.25
Net assets / (liabilities)	1,792.26	1,518.28	(18.35)	3,292.19

ac The Company's exposure to foreign currency risk as of April 1, 2015 expressed in INR, is as follows:

	March 31, 2015			
	USD	EUR	CHF	Total
Financial assets				
Cash and cash equivalents	771.85	729.36	-	1,501.21
Trade receivables	134.16	485.39	-	619.55
Unbilled revenue	74.73	373.91	-	448.64
Financial liabilities				
Trade payables		20.15	7.30	27.45
Other liabilities		2.96	0.54	3.50
Net assets / (liabilities)	980.74	1,565.55	(7.84)	2,538.46

ad Sensitivity

For the year ended March 31, 2017 and March 31, 2016, every percentage point appreciation/depreciation in the exchange rate between the Great Britain Pound and U.S. Dollar (USD) / Euro (EUR) / Swiss Francs (CHF), has affected the Company's incremental operating margins in the following manner :-

Year ending March 31, 2017 :

EUR : 0.53%

USD : 0.85%

CHF : (0.17%)

Year ending March 31, 2016 :

EUR : 0.89%

USD : 1.06%

CHF : (0.15%)

Sensitivity analysis is computed based on the changes in the income and expenses in foreign currency upon conversion into functional currency, due to exchange rate fluctuations between the previous reporting period and the current reporting period.

(b) Credit risk

Credit risk refers to the risk of default on its obligation by the counterparty resulting in a financial loss. The maximum exposure to the credit risk at the reporting date is primarily from trade receivables amounting to Rs. 3,732.62 lakhs and Rs. 5,751.30 lakhs as of March 31, 2017 and March 31, 2016, respectively and unbilled revenue amounting to Rs. 4,645.22 lakhs and Rs. 2,954.15 lakhs as of March 31, 2017 and March 31, 2016, respectively. Trade receivables and unbilled revenue are typically unsecured and are derived from revenue earned from customers located in the United States, Austria, Switzerland and elsewhere. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of customers to which the Company grants credit terms in the normal course of business. On account of adoption of IND AS 109, the company uses expected credit loss model to assess impairment loss or gain. The company uses a matrix to compute the expected credit loss allowance for trade receivables and unbilled revenue. The provision matrix takes into account available external and internal credit risk factors and company's historical experience for customers.

ba The following table gives details in respect of percentage of revenues generated from top customer and top five customers, other than related parties:

	Year ended March 31, 2017	Year ended March 31, 2016	Year ended April 1, 2015
Revenue from top customer	20.21%	24.73%	27.51%
Revenue from top five customers	63.74%	63.70%	70.14%

bb The allowance for life time expected credit loss on customer balances for the year ended March 31, 2017 and March 31, 2016 was Rs.17.80 lakhs and Rs. 1.50 lakhs, respectively. The increase of allowance for life time expected credit losses/(gains) on customer balances for the year ended March 31, 2017 and March 31, 2016 was Rs. 16.73 lakhs and Rs. (20.19) lakhs, respectively.

	March 31, 2017	March 31, 2016
Balance at the beginning of the year	1.50	20.22
Translation differences	(0.43)	3.42
Impairment losses recognised /(reversed)	16.73	(20.19)
Write offs	-	(1.95)
Balance at the end	17.80	1.50

The Company's credit period generally ranges from 60-90 days

	March 31, 2017	March 31, 2016	April 1, 2015
Trade receivables	3,732.62	5,751.30	5,042.88
Unbilled revenues	4,645.22	2,954.15	2,096.63
Days sales outstanding - DSO (days)	96	106	95

bc Credit risk on cash and cash equivalents is limited as the Company generally invests in deposits with banks and financial institutions with high credit ratings assigned by international and domestic credit rating agencies.

(c) Liquidity risk

Liquidity risk is defined as the risk that the Company will not be able to settle or meet its obligations on time or at a reasonable price. The Company's corporate treasury department is responsible for liquidity and funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management. Management monitors the Company's net liquidity position through rolling forecasts on the basis of expected cash flows. As of March 31, 2017, cash and cash equivalents are held with major banks and financial institutions.

- ca The table below provides details regarding the remaining contractual maturities of significant financial liabilities at the reporting date. The amounts include estimated interest payments and exclude the impact of netting agreements, if any.

	As at March 31, 2017				
	Contractual cash flows				
	Carrying value	Less than 1 year	1-2 years	2-4 years	Total
Trade payables	11,416.19	11,416.19			11,416.19
Other financial liabilities	989.70	989.70			989.70

	As at March 31, 2016				
	Contractual cash flows				
	Carrying value	Less than 1 year	1-2 years	2-4 years	Total
Trade payables	4,039.31	4,039.31			4,039.31
Other financial liabilities	1,836.72	1,836.72			1,836.72

	As at April 1, 2015				
	Contractual cash flows				
	Carrying value	Less than 1 year	1-2 years	2-4 years	Total
Trade payables	2,828.76	2,828.76			2,828.76
Other financial liabilities	1,127.02	1,127.02			1,127.02
